Computer Engineer | IEEE CSTAM Ambassador | IEEE Member

CAREER SUMMARY

Computer Engineer with strong skills in hardware, software, and embedded systems. Passionate about technology, problem-solving, and teamwork, with experience in projects ranging from processor design to IoT applications and full-stack web development. Active in professional communities and always eager to learn and grow.

KEY SKILLS

Technical Skills

Programming: C (Structured Programming), C++ (OOP & Data Structures), Python, SQL, Apex, Verilog, Linux

Web Development: HTML, CSS, JavaScript, React

Tools & Platforms: Visual Studio Code, JIRA, Quartus, emu8086, Electronics Workbench, Kaggle

Hardware & IoT: Raspberry Pi, Embedded Systems, Semiconductor Design

UI/UX Design: Figma, Wireframing & Prototyping, Design Systems & Visual Consistency, User Journey Mapping, Usability Testing & Feedback Analysis

Soft Skills

Time Management | Critical Thinking | Problem-Solving | Communication | Leadership | Team Collaboration | Adaptability

PROFESSIONAL EXPERIENCE & PROJECTS

Make Work Flow GmbH | Amman, Jordan (HQ: Hamburg, Germany) — 2025 – Present

Software Developer

Hamburg-based company combining lean principles, IoT, and Microsoft Power Platform solutions to digitize workflows. Working from the Amman office as a Software Developer.

Dot Jordan | Amman, Jordan — 2025

Full Stack Developer Intern

Completed a full stack development internship, gaining practical experience in web application development.

Ministry of Digital Economy and Entrepreneurship | Amman, Jordan — 2025

QA Engineer & UI Tester

Worked on the Sanad Application, performing functionality testing, UI validation, and ensuring a smooth user experience.

Umniah | Amman, Jordan — 2025

Internship

Applied engineering skills in a professional telecom environment, working on hardware/software integration tasks.

Project 2 Market - Semiconductors Design Program | — 2024

Participated in advanced training in semiconductor design, focusing on circuit design and practical applications.

42 Amman - Core Program | — 2025 - Present

Currently a Core Program student, gaining in-depth expertise in software engineering and project-based problem-solving at one of the world's leading coding schools.

CS50's to Databases with SQL

Completed Harvard "CS50's to Databases with SQL" course, gaining hands-on experience with SQL queries, data modeling, normalization, indexing, and relational database design.

SELECTED PROJECTS

Single-Cycle Processor with Pipeline (JOSDC 2024): Designed and implemented a Verilog-based processor with pipeline stages.

Portable EV Charger: Developed a compact and mobile charging solution for electric vehicles, supporting dynamic charging during movement.

Raspberry Pi IoT Applications: Built projects involving GPIO programming and IoT system integration using Python and Linux.

Featured Projects

- TripTime Project
- Winter is Coming
- TableBooker Project

EDUCATION

Al-Balqa' Applied University | — 2021 - 2025

Bachelor of Computer & Electrical Engineering

42 Amman - Core Program Student | — 2025 - Present

Diploma in Software Engineering

Droob Alasala School | — 2019

High School

CERTIFICATES & COMPETITIONS

- JOSDC 2024 - Processor Design Project
- IEEE Computer Society SYP Global Congress Participant (2024)
